AMBITIONS IN SHAPING THE FUTURE OF SDG REPORTING

SDG REPORTING WILL BE:

More Straightforward

→ Relevant Indicators

Easier to understand

→ Guidance for Business Practitioners

Simpler to execute

→ Alignment/merging GRI Standards & UNGC Communication on Progress

Accessible to all users

→ Aggregation of data

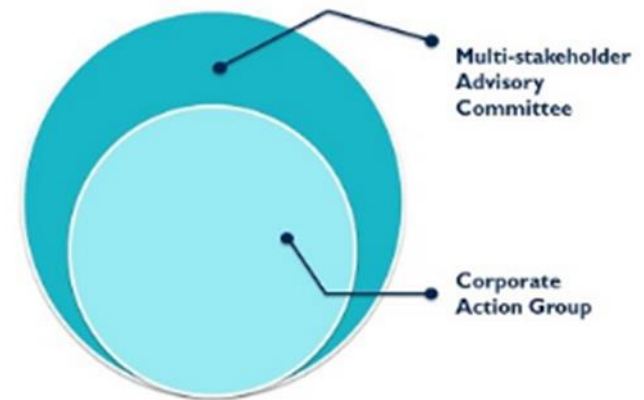

ENGAGING LEADING BUSINESSES AND NON-CORPORATE STAKEHOLDERS

The Action Platform is built from two components:

The **Corporate Action Group (CAG)** serves as a business engagement and peer learning forum, where business representatives can demonstrate leadership by helping define and promote their contributions to the SDGs.

The **Multi-stakeholder Advisory Committee (MAC)** is comprised of the members of the CAG, plus representatives from other stakeholder groups: governments, international and civil society organizations, investors, trade unions, data users, statistical offices and academics. This committee will provide guidance for the research and analysis done by the UN Global Compact and GRI.
